CENTENARUL AVIONULUI cu REACȚIE

ANIVERSAM O SUTA DE ANI DE LA PROIECTAREA; CONSTRUIREA SI TESTAREA PRIMULUI AVION CU REACTIE DIN LUME
16 DECEMBER 1910, ISSY LES MOULINEAUX, lângă PARIS, FRANȚA **inventator: Henri COANDA**

apa COANDA water

WATER—THE MOST AMAZING SUBSTANCE ON EARTH

Water is alive. The discovery made by Henry Coanda in the 1920s showed that water flowing over any surface tends to cling to that surface. As the rivers flow, the water clings to rocks and soil picking up the minerals on its way down. As the water picks up speed and goes around and over rocks, spinning in different directions, millions of vortices are formed. The swirling vortices produce electricity which has been measured in lab tests and reveals that this motion colloidalized the minerals making them easily absorbable by the body.

CONTACT review 27th August 1996

...Viața este un fenomen aquatic...suntem 78% apă și suntem puternic influențați de locul nașterii, de unde bem apă pentru prima dată în viață...

...Life is an aquatic phenomenon... We are about 78% water and we are deeply affected by our birth place where we drunk water for the first time...
